Skills

Results-driven Senior Full Stack Developer with over 10 years of experience in designing, developing, and deploying scalable web applications. Passionate about integrating modern engineering practices with emerging AI-driven technologies such as Agentic AI, LLM-based automation, and intelligent software copilots.

Technical Skills

Languages: Ruby, Python, Javascript, TypeScript

Frameworks: Rails, FastApi, Flask, Django, Express

Database: MSSQL, PostgreSQL, MongoDB

Frontend Frameworks: Angular 19.0

DevOps: CI/CD, Docker, Message Queues, Kubernetes

Version Control: Git, GitHub, GitLab, Azure DevOps

Testing: RSpec, Jasmine, Mocha, Selenium, PyTest

Others: Agile Methodologies, TDD/BDD, Microservices, Cloud Computing, RESTful, Agentic AI workflows, LLM Integration (OpenAI, Anthropic), RAG Pipelines, Model Context Protocol (MCP)

Experience

JANUARY 2022 - PRESENT

Ørsted Services Malaysia, Kuala Lumpur, Malaysia – Senior Full Stack Developer

- Calculate revenue from different offshore and onshore wind farms. Introduced a Python based calculation service that runs 5x times faster than the legacy system.
- Acted as Tech Lead for a cross-functional team, facilitating backlog grooming, architecture reviews, and sprint demos to stakeholders.
- Played a key role in improving the team's development workflow by introducing CI/CD best practices and exploring AI-assisted development workflows using LLM copilots to enhance code quality and delivery speed.
- Took ownership of technical planning and led discussions around architecture decisions across multiple teams. Prioritized business by working closely with product owners and stakeholders.
- Mentored a team of junior developers, providing guidance on coding best practices, code reviews, and technical challenges.
- Regularly led sprint reviews, retrospectives and technical deep dives in agile environment.

MARCH 2019 - DECEMBER 2021

Adzymic PTE Ltd., Kuala Lumpur, Malaysia – Senior Software Engineer

- Acted as a go-to person for resolving tough technical issues, guiding teammates through debugging sessions and architecture discussions.
- Wrote scraping engines to extract data from various E-Commerce sites to turn them into advertisements.
- Improved database performance by optimizing queries and redesigning parts of the schema — resulting in faster load times.
- Proposed and led the adoption of scalable architecture patterns, contributing to improved system reliability and maintainability.
- Worked closely with the team to drive improvements in how we tested and shipped code, including automating key parts of the QA procedure.
- Tracking creative smart tags, machine learning based advertisement serving logic enhancement.

MARCH 2016 - FEBRUARY 2019

Dohatec New Media, Dhaka, Bangladesh – *Software Engineer*

- Developed dynamic web applications using Python and JavaScript frameworks.
- Data Import from various file based resources (e.g. CSV, Excel), web based sources (e.g. JSON, XML, HTML), databases (e.g. MySQL, PostgreSQL)
- Participated in the transition of monolithic applications to microservices architecture, reducing deployment times and enhancing scalability.
- Collaborated closely with product managers to define technical requirements and deliver on project deadlines.

SEPTEMBER 2013 - MAY 2015

Nascenia Ltd., Dhaka, Bangladesh – *Jr. Software Engineer*

- Created a marketplace application with multiple sellers, buyers for farmers who work as a local vendor to provide quality foods around the country.
- Extend the functionality of a wedding photographer management software.

Education

APRIL 2009 - AUGUST 2013

Mawlana Bhashani Science and Technology University, Tangail, Bangladesh

Acquired CGPA 3.55 (out of 4.0), B.Sc. in Information and Communication Technology

Research

An Efficient Approach for Keyphrase Extraction from English Document. ([Link](#))

Published in International Journal of Intelligent Systems and Applications(IJISA)

Certification

JULY 2024

Certified Kubernetes Application Developer (CKAD)

FEBRUARY 2022

Certified SAFe® 5 Practitioner
